Description	Features of Clinical Nutritional. It is an electric crane for patients with disabilities, allowing them to weigh. Lifting capacity 130 kg. Compact dimensions. Contains a material coated hanger slip safety hooks and crosses to prevent the tape from the harness to loosen up, also has an ergonomic handle thrust, slip coated material and is ergonomically shaped to push the crane from different positions comfortably. It is used in the teaching environment for students to update the new tools used in future dietary-therapeutic cabinets. It is one of the few existing cranes in Valencia, which provides foster care assistance when required and comprehensive knowledge and teacher education, improving the professionalism of its students for the future. The material is placed Clinical Nutritional, which is the first clinic developed in Spain, which can improve the training of Health Sciences, such as students of Degree in Human Nutrition and Dietetics and the degree in Pharmacy, as developed in three clinical skills, patient care, teaching and research.
Goals	<ul style="list-style-type: none"> <li>- Acquisition of equipment for Clinical Nutrition.</li> <li>- Implementation of Clinical Nutrition.</li> <li>- Development of educational internships for students of Health Sciences (Degree in Human Nutrition and Dietetics and Bachelor in Pharmacy).</li> <li>- Provision of services to the academic community and society to improve the nutritional status and health.</li> <li>- Development of research projects on topics of nutrition, diet, diet therapy and nutritional pathology.</li> <li>- Upgraded with new equipment in the first Clinical Nutritional pioneer in Spain, allowing the improvement of teacher education students in the Health branch, since in her weekly work experience that involve small groups, with dietitians, nutritionists hired specifically for the Clinic. This new facility allows us to complete the nutritional status of disabled patients, to assess their anthropometric and nutritional status, which results in improving their health.</li> <li>- Acquisition of a crane and electric hook attached to the crane scales for Clinical Nutritional.</li> <li>- Improved teacher training for students of Health Sciences (Degree in Human Nutrition and Dietetics and Bachelor in Pharmacy).</li> <li>- Provision of services to the academic community and society to improve the nutritional status and health.</li> <li>- Development of research projects that can incorporate the study of anthropometric measures for the disabled, providing knowledge and improve their health.</li> </ul>
