Description	In VLC / CAMPUS project was conceived a space to promote excellence in legal education and graduate through the provision of infrastructure and facilities adapted to the new curriculum needs by acquiring leading technology to foster learning methodologies.
Goals	<ul style="list-style-type: none"> • The training model based on the Legal Clinic connected with legal education legal reality gave students the opportunity to learn and act on real cases. • In the clinical methodology used interactive methods to teach skills and competencies required for legal practice. In this way, students have the opportunity to work with real clients and at the same time, their activities are supervised and guided by lawyers and expert teachers in a structured and consistent. • Learning with the clinical method is a process of learning how to learn from experience (learning by doing).
Results	<ul style="list-style-type: none"> • This project has involved the adequacy of a space in the same building of the Faculty of Law with various offices equipped with computer equipment, a meeting room and a space for communication and customer care and administrative management of students.
