

Project Fiche

Programme to promote research and innovation activities
in cooperation with the Health Research Foundations of
the Campus of International Excellence

Project summary	
Project	Programme to promote research and innovation activities in cooperation with the Health Research Foundations of the Campus of International Excellence (CEI)
Scope	Scientific Improvement
Programme	Creation of joint resources for research and innovation
Target group	University research staff and professionals who are members of health research foundations
Call	Excellence 2010
Responsible organisation	Offices of the Vice-Principal responsible for research and innovation in universities Research management structures
Start	2012
End	2015
State	In Progress
Budget	<ol style="list-style-type: none"> 1. VLC_Biomed Programme: <ul style="list-style-type: none"> ■ Cooperation in translational research: Grants for the creation of innovative collaborative projects. <ul style="list-style-type: none"> ■ Funding of 2015 Programme: 176,000 € (50% by VLC/Campus) ■ Preparatory proposals for innovation projects in cooperation: Grants for conducting exploratory actions for developing innovation projects in cooperation. <ul style="list-style-type: none"> ■ Funding of 2015 Programme: 40,000 € (50% by VLC/Campus) 2. VLC_Bioclinic Programme: <ul style="list-style-type: none"> ■ Preparatory proposals for innovation projects in cooperation: Grants for conducting exploratory actions for developing innovation projects in cooperation. <ul style="list-style-type: none"> ■ Funding of 2015 Programme: 40,000 € (50% by VLC/Campus)

Description	<p>Entities promoting VLC/CAMPUS are of great importance for the scientific and technology transfer activity in the area of health of their local environment. They have agreed to mobilize resources to start implementing initiatives of excellence that would sustain and increase their strong involvement in the productive and care environment.</p> <p>The strategic plan of the VLC/CAMPUS, Campus of International Excellence believe that one of the keys for the process of modernisation of research activity lies in promoting interagency collaboration. To this end, it proposes to launch initiatives contributing to the improvement of scientific, innovation and knowledge transfer activity in the field of health to ensure that the innovations resulting from the multidisciplinary and interagency biomedical research are for the benefit of patients.</p> <p>Universities, in the framework of activities of the VLC/CAMPUS International Campus of Excellence, aim to take this strength and establish concrete partnerships with the hospital research foundations strongly related to the VLC/CAMPUS field of expertise in health to establish coordinated research activities involving the creation of joint resources for innovation and research by the implementation of innovative collaborative projects and by financing preparatory proposals for innovation projects in cooperation.</p>

Project summary	
Objectives	<p>Both entities, aware that the process of innovation and technology transfer require multidisciplinary collaboration between professionals from different fields, aim to promote multidisciplinary translational research between researchers and professionals from both institutions.</p> <p>The cooperation modalities with health research foundations are:</p> <ul style="list-style-type: none"> ■ Cooperation in translational research: Grants for the creation of innovative collaborative projects. ■ Preparatory proposals for innovation projects in cooperation: Grants for conducting exploratory actions for developing innovation projects in cooperation.
